## Letter of reference for Mr Christian Walonka, born December 30, 1988

Christian Walonka was a student in my course “Algorithms and data structures” which I taught in the summer term 2010. In addition, he did his excellent Bachelor thesis “Development of an Android Application for 3D Acceleration Data” under my supervision in the winter term 2011/12.

He attracted my attention with his good analytical skills, creativity and quick comprehension. In his Bachelor thesis he also demonstrated his superior software engineering skills.

Based on his achievements under my supervision and compared with the rest of the students of his year, he is among the top 25%. I am convinced that he is a creative and productive student. Additionally, I would like to mention that he has a pleasant personality, he is open and communicative.

Summarizing, I can recommend Christian Walonka to be admitted to a Master program.

Hans-Peter Kriegel  
Professor of Database and Information Systems  
Vice Department Chair
